WELCOME

WELCOME TO DRIVE CULTURE

Find the best roads on Vancouver Island and in the Lower Mainland, plan drives with your friends, join car clubs and show up to cruises and meets. This guide walks you through everything, one feature at a time.

EYES ON THE ROAD

Never use your phone while driving. Start recording or navigation before you set off, then put the phone away. Passengers can post.

ABOUT THE PICTURES

The screens in this guide use sample drivers, clubs and events, so what you see in the app will differ. On iPhone, maps use Apple Maps, and on Android, Google Maps.

YOUR FIRST FIVE MINUTES

1. Create your account and pick your area
2. Add your car to your garage
3. Join a club or two
4. RSVP to a cruise or meet
5. Record your next drive

START HERE

GETTING STARTED

You can be set up and exploring in a few minutes. Here's how.

1 Install the app

While Drive Culture is in testing: on **iPhone**, open the TestFlight link we send you (or the email invite from Apple), install the free **TestFlight** app and tap **Install**. On **Android**, open the Google Play test link we send you, tap **Become a tester**, then install it from Google Play (see **On Android**).

2 Create your account

The quickest way: tap **Continue with Apple** (iPhone) or **Continue with Google** and pick your account. There's no password to make, and you then check your name and choose your **handle**, how people find and mention you. Or tap **Create account** and use your email: enter your name, a handle, your email and a password of at least 8 characters, twice.

3 Turn on Face ID or fingerprint (optional)

After you sign in, the app offers to lock itself with Face ID or Touch ID on iPhone, or your fingerprint or face unlock on Android. You can change this any time in **Settings → Security**.

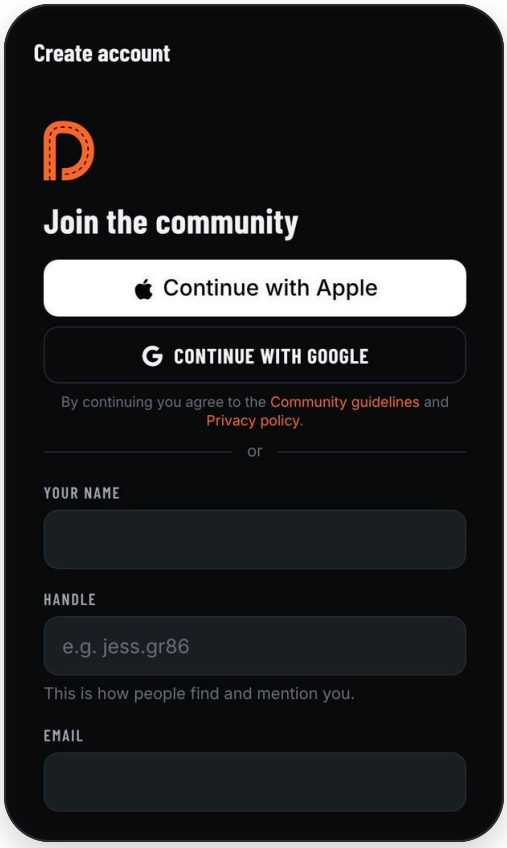

4 Allow location and notifications

Location records your drives, checks you in at events and goes with an emergency alert. On iPhone, allow it **Always** with **Precise Location** on. On Android, **While using the app** with **Precise** is all it needs. Notifications tell you about messages, event changes, club invites and emergency alerts.

Updates arrive by themselves. When you see **A new version of Drive Culture is ready**, tap **Restart**.

The welcome screen

Create your account

START HERE

SIGNING IN AND YOUR PASSWORD

Sign in the same way you signed up. Forgot your password? A 6-digit code by email sets a new one.

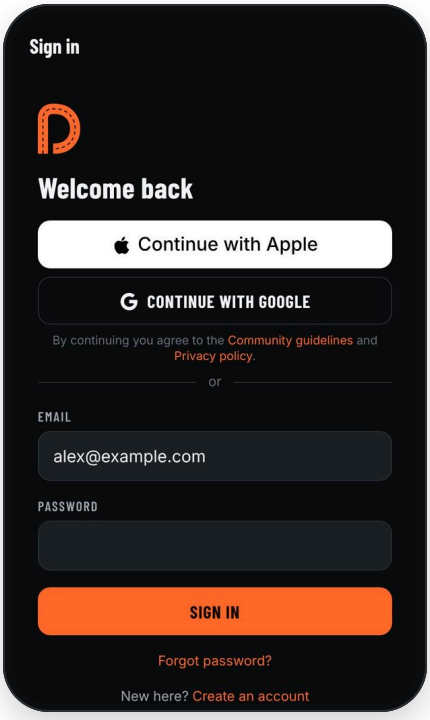

1. **Sign in**
   Tap **Sign in** on the welcome screen. If you signed up with Apple or Google, tap that button again. If you used your email, enter it with your password. Once you're in, the app keeps you signed in.

2. **Forgot your password?**
   On the Sign in screen, tap **Forgot password?**, check your email address and tap **Send code**.

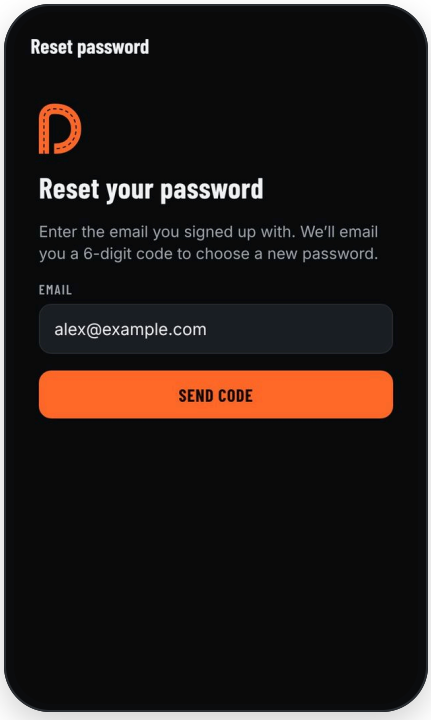

3. **Check your email**
   A code arrives from **noreply@driveculture app.com** with the subject **Your Drive Culture password reset code**. It can take a minute, so check your spam or junk folder too. The code works for an hour.

4. **Set a new password**
   Type the 6-digit code, then your new password twice, and tap **Set new password**. You're signed in with it straight away. No email after a minute? Tap **Send a new code**.

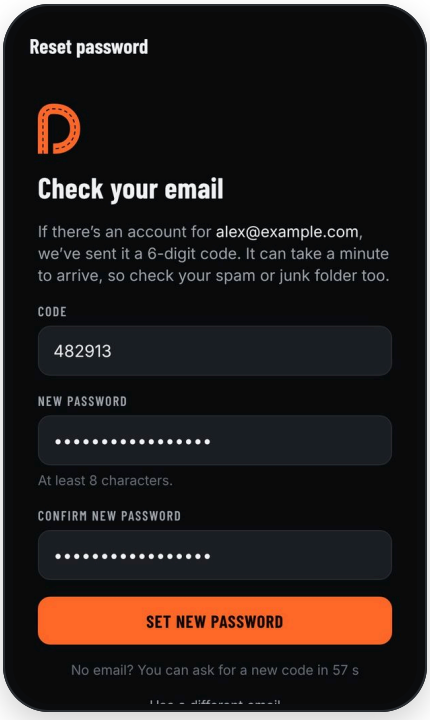

Signed up with Apple or Google? You don't have a Drive Culture password, so there's nothing to reset. Tap **Continue with Apple** or **Continue with Google** instead. For your privacy, the app never says whether an email has an account.

Sign in

Forgot password

Enter the code

START HERE

ON ANDROID

Drive Culture works the same on Android phones. Here's what's different, from installing it to recording a drive.

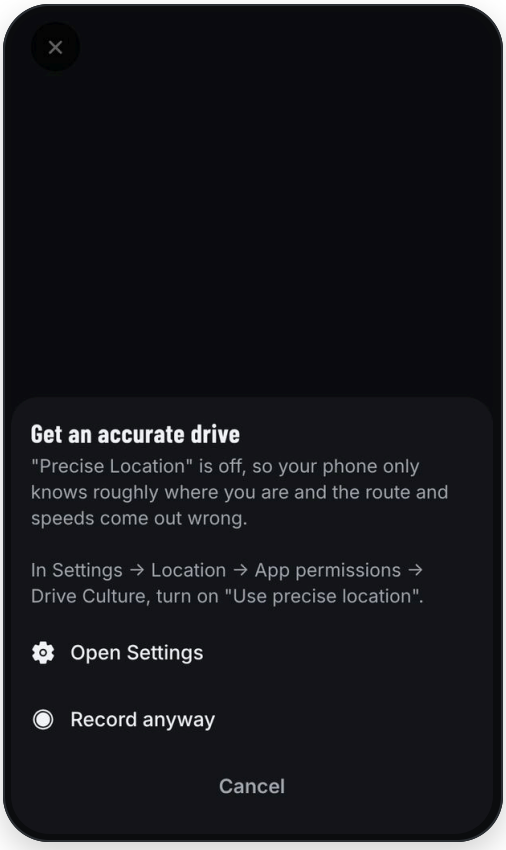

1. **Install from Google Play**
   While Drive Culture is in testing, we send you a link to join the test. Open it on your phone, signed in with the Google account you gave us, tap **Become a tester**, then **Download it on Google Play** and tap **Install**. Had the app from a download link before? Uninstall that one first, then sign in again: your drives and posts are saved online.

2. **Location: precise, while using the app**
   When Android asks, choose **Precise** and **While using the app**. That's all recording needs, even with the screen off, so you're never asked for "all the time". If you picked Approximate, go to **Settings → Location → App permissions → Drive Culture** and turn on **Use precise location**.

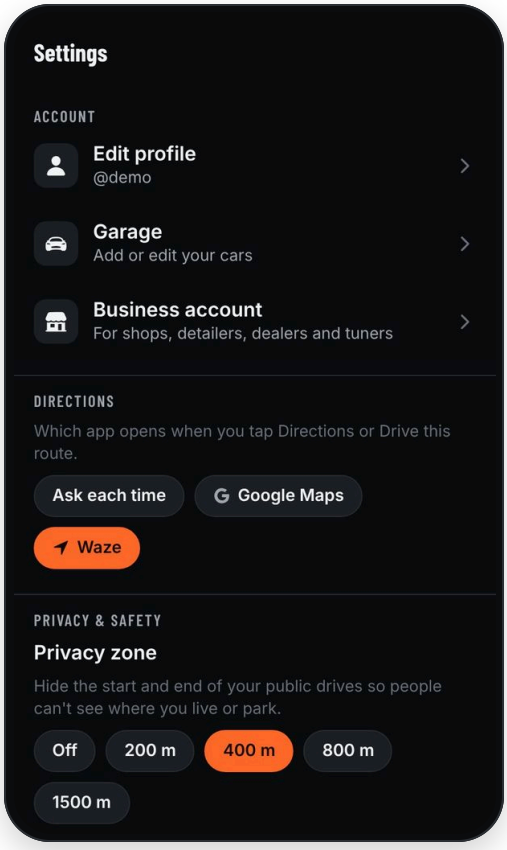

3. **Notifications**
   Tap **Allow** when asked. While a drive records, a **Drive Culture is recording your drive** notification shows; tap it to come back to the app. Emergency alerts come as notifications too, so keep them on.

4. **Battery**
   Some phones put apps to sleep to save battery, which can cut a drive short. Go to **Settings → Apps → Drive Culture → Battery** (or **App battery usage**) and choose **Unrestricted**. On Samsung, also check it isn't in **Sleeping apps**.

5. **Unlock, maps and directions**
   Lock the app with your fingerprint or face unlock in **Settings → Security**. Maps in the app use Google Maps, and Directions and Start & navigate open **Google Maps** or **Waze**.

If precise location is off

Directions on Android

START HERE

ISLAND OR LOWER MAINLAND

Drive Culture covers Vancouver Island and the Lower Mainland, from the Sunshine Coast to Whistler, Hope, Princeton and Merritt. Pick your area and you see its roads, events and clubs first.

1 Pick your area

The first time you open Explore, the app asks **Where do you drive?** Choose **Vancouver Island**, **Lower Mainland** or **Both areas**.

2 Switch any time

The chips at the top of **Explore**, **Roads**, **Clubs** and **Events** switch between **Vancouver Island**, **Lower Mainland** and **Both**. Your choice carries across all of them.

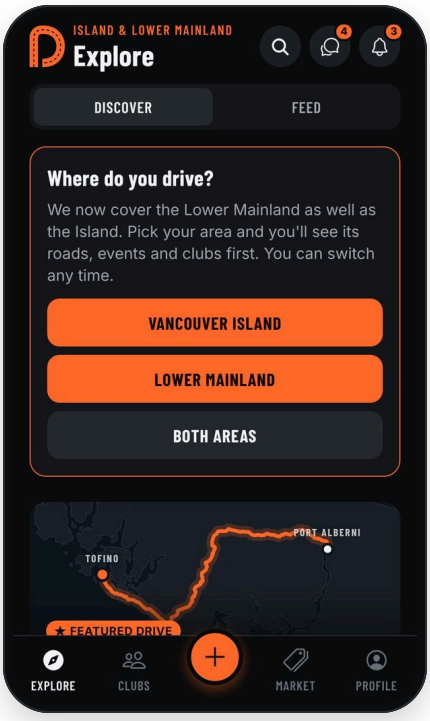

3 What changes

Upcoming cruises and meets, popular roads, the road map and clubs to discover follow the area you pick. Your own clubs, drives and routes always show, wherever they are.

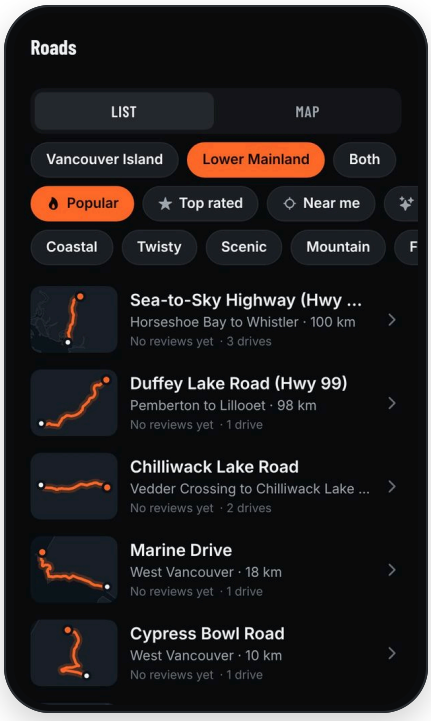

4 Your home area

Change it in **Profile → Edit profile → Where you drive**. **Home town** is the place shown on your profile, like Victoria or Surrey.

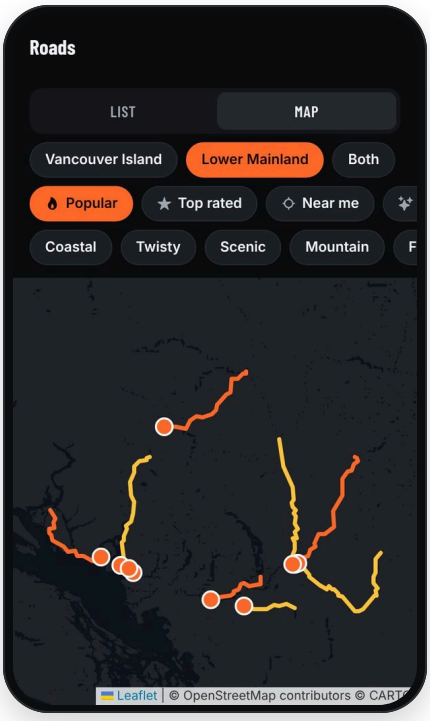

Clubs and events have an area too. A club's owner sets it in **Edit club → Area**, and an event takes the area of its meeting point. Anyone can still find and join a club in the other area.

Where do you drive?

Lower Mainland roads

The Lower Mainland on the map

THE BASICS

FINDING YOUR WAY AROUND

Five tabs along the bottom take you everywhere. The orange **+** in the middle is how you create anything.

EXPLORE

Discover shows upcoming cruises and meets, popular roads, clubs, marketplace picks and the top drivers this month, for the area picked at the top. **Feed** shows posts from people you follow, or everyone.

CLUBS

Your clubs, plus clubs to discover and the Club of the Month.

+ CREATE

Record a drive, share a post, plan a route, plan an event, sell something, start a club or add a car.

MARKET

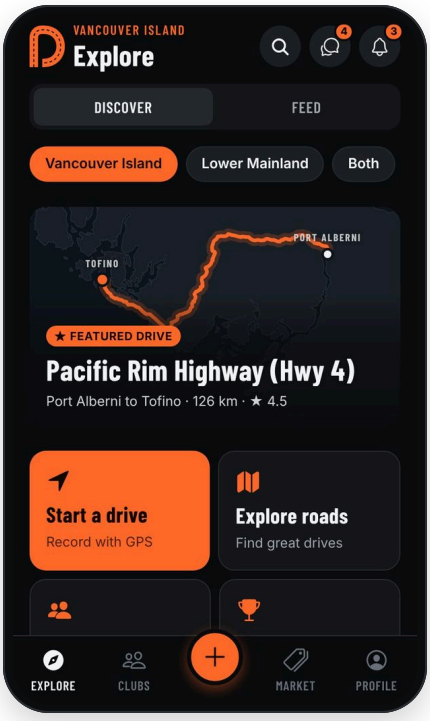

Buy and sell cars, parts and services, and find parts that fit your car.

PROFILE

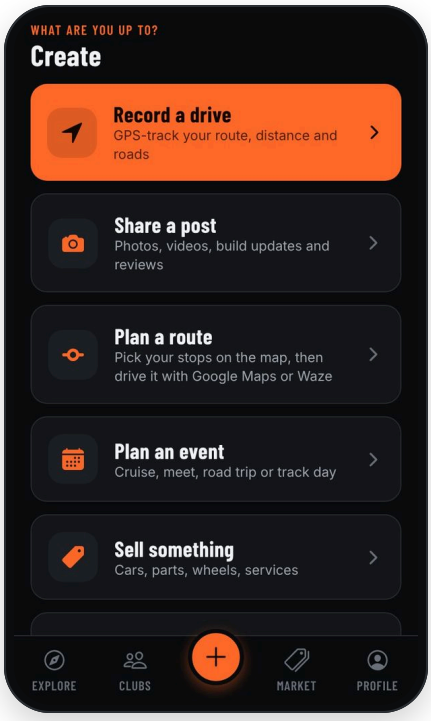

Your garage, drives, routes, posts and badges. The gear icon opens Settings.

TOP RIGHT

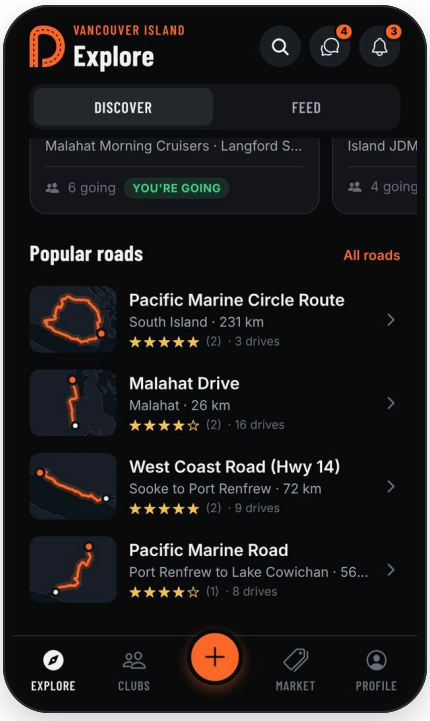

Search (drivers, clubs, roads, events, listings), **Messages** and **Notifications**. A number shows anything unread.

Explore → Discover

The + Create menu

More on Discover

YOUR PROFILE

YOUR GARAGE AND PROFILE

Add your car first: it's used across the app, from parts that fit to the car you're bringing to a meet. Then make your profile your own.

1 Add a car

Go to **Profile → Garage → Add a vehicle** (or **+ → Add to your garage**). Enter the year, make and model, and optionally the generation (like E46), trim, colour, a nickname and your mods, one per line.

2 Pick your main car

Turn on **Main car** for the one you drive most. It's shown first in your garage and picked by default when you record a drive.

3 Edit your profile

Tap **Edit profile** to add a photo (drag and pinch to fit it in the circle), a short bio, your home town and where you drive.

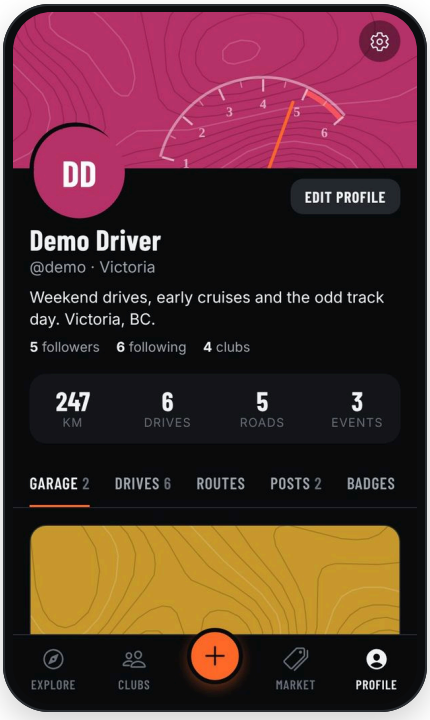

4 Pick a background

The banner across the top of your profile. Under **Background**, choose **Design**: one of 8 colours with topo lines and a graphic, **Race number** (your own, 0 to 99), **Gauge**, **Checkered flag** or **None**. Or choose **Photo** and move and zoom your own picture.

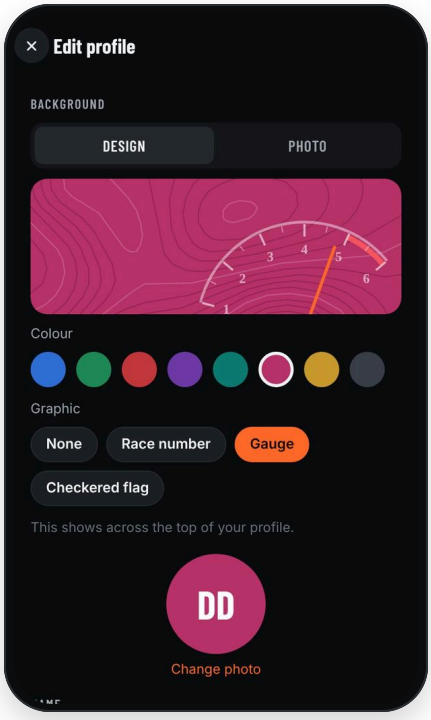

5 Your profile tabs

Garage, **Drives**, **Routes**, **Posts** and **Badges**. Others see your public drives, shared routes and posts here, and can follow or message you.

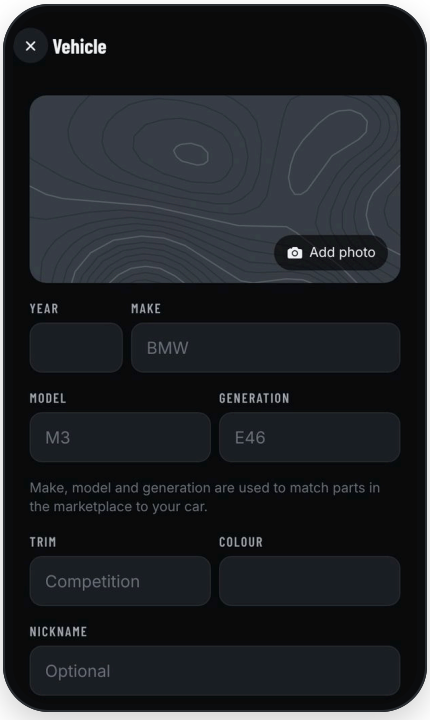

Run a shop? Turn on **Settings → Business account** for shops, detailers, dealers and tuners. Your profile then shows your category, address, phone, website and hours, plus a Services tab.

Your profile

Pick a background

Adding a car

DRIVE

RECORD A DRIVE

Record your drives with GPS to build your stats, see which roads you drove and share the good ones.

1 Start it

Tap **+** → **Record a drive** (or **Start a drive** on Explore), pick your car and tap **Start drive**. Using Waze or Google Maps? **Start & navigate with Waze** starts recording and opens your app in one tap.

2 Your settings, checked

Before you set off, the app checks your location settings and tells you if one would spoil the drive. On iPhone: **Settings → Drive Culture → Location**, choose **Always** and turn on **Precise Location**. On Android: turn on **Use precise location**. Tap **Open Settings**, or **Record anyway**.

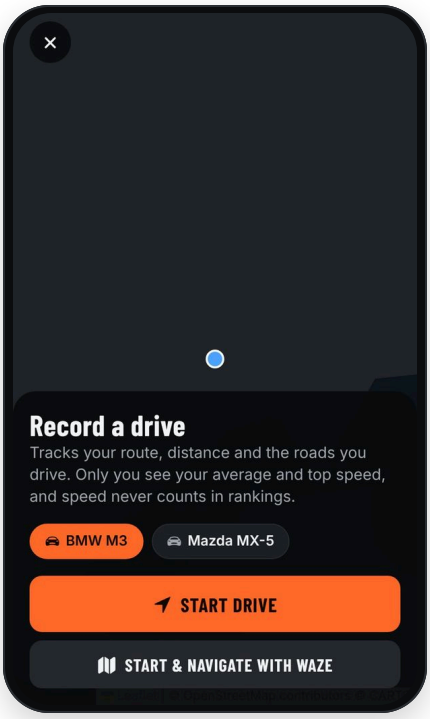

3 While you drive

Put the phone away. Your position is recorded every second, with the screen locked or while you navigate in another app. On iPhone, the Lock Screen and Dynamic Island show the distance and time; on Android, a notification shows while it records. **Open Waze** takes you back to your directions. Stopping for coffee? Tap **Pause**.

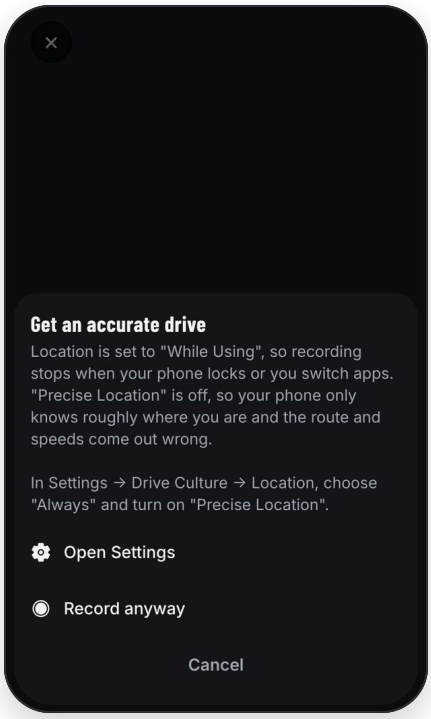

4 Finish and save

Tap **Finish** and review your distance, time, top speed, climb and the roads you drove. Add a title, notes and the car, then choose who can see it (**Everyone**, **Followers** or **Only me**) and whether to share it to your feed.

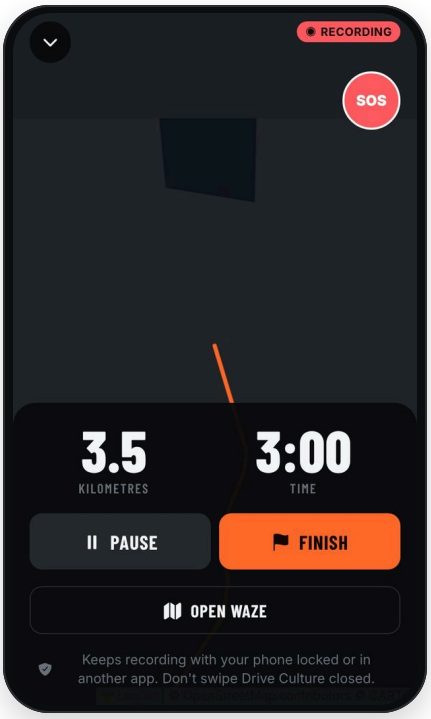

Don't swipe Drive Culture closed. Recording keeps going in the background, but closing the app from the app switcher stops it. Anything not recorded shows as a dashed line.

Start, or start and navigate

If a setting needs changing

Recording

DRIVE

YOUR DRIVES

Every saved drive gets its own page with the map and stats.

1. **The stats**
   Distance, total and moving time, average and top speed, and climb. **Only you see your speeds and moving time.** Everyone else sees the distance, time and climb.

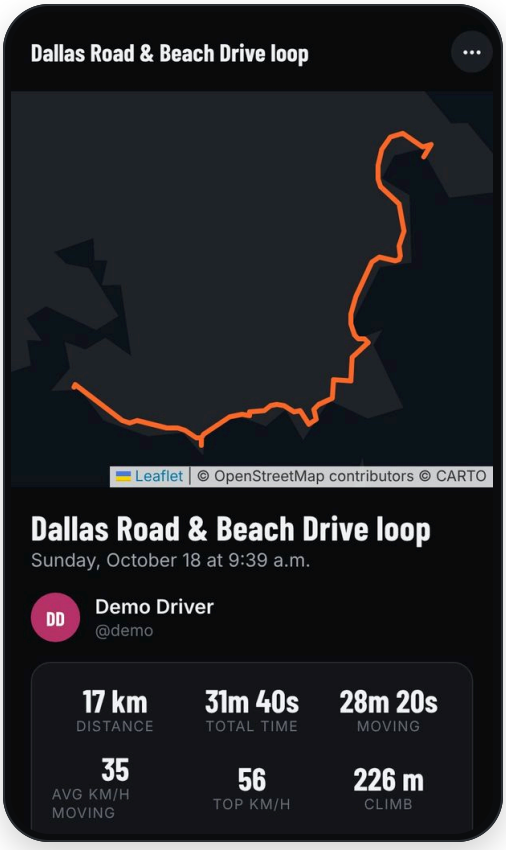

2. **Roads driven**
   Drives are matched to the road library automatically. Each new road you drive counts toward Road Explorer rankings and badges.

3. **Gaps in a drive**
   If part of a drive wasn't recorded (the app was swiped closed or GPS dropped out), that stretch shows as a dashed line and doesn't count toward top speed.

4. **Share it**
   Share picture makes a picture of the drive (route, distance, time, climb, roads and car) for Instagram, Facebook, WhatsApp or messages. Your speed is never on it, and your privacy zone stays hidden. **Post to feed** shares it in Drive Culture, once.

5. **Publish it**
   Found a great road that isn't in the library? **Publish as a road** turns your drive into a community road with a name, area, description and tags.

Speed never counts. Rankings reward distance, exploring and showing up. Drives over 140 km/h, or with an impossible average, are left out of rankings automatically.

Your drive: only you see speeds

Share a picture

EXPLORE

ROADS

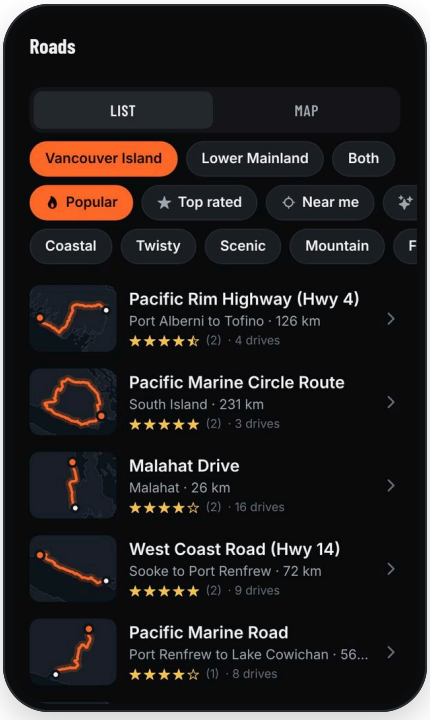

A library of the best drives on the Island and in the Lower Mainland: curated roads traced along the real road, plus community roads published from members' drives.

1 Find a road
Tap **Explore roads** on Explore. Pick **Vancouver Island**, **Lower Mainland** or **Both**, switch between **List** and **Map**, sort by **Popular**, **Top rated** or **Near me**, and filter by tags like Coastal, Twisty or Mountain.

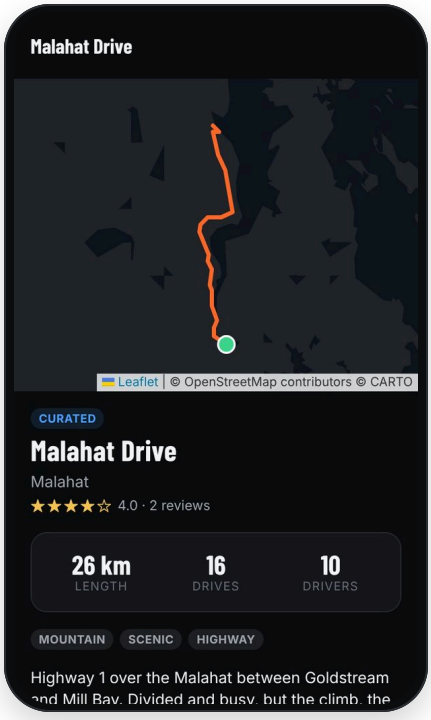

2 Check it out
A road's page shows its length, how many drives and drivers it's had, a description, upcoming events on it and who drove it recently.

3 Drive it
Drive this road opens your navigation app through the road (Waze and Google Maps open straight to the directions). **Record** starts the recorder, and **Plan a cruise** starts an event on this road.

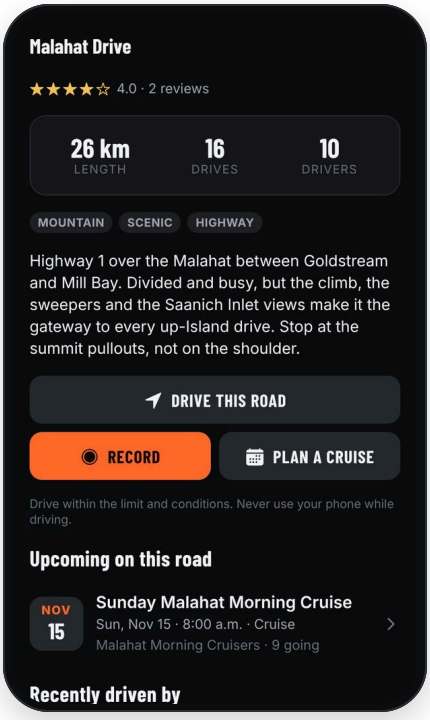

4 Review it
Driven it? Leave a star rating and a few words about the surface, traffic or best time to go.

The road library

A road

Drive it or plan a cruise

PLAN

PLAN A ROUTE

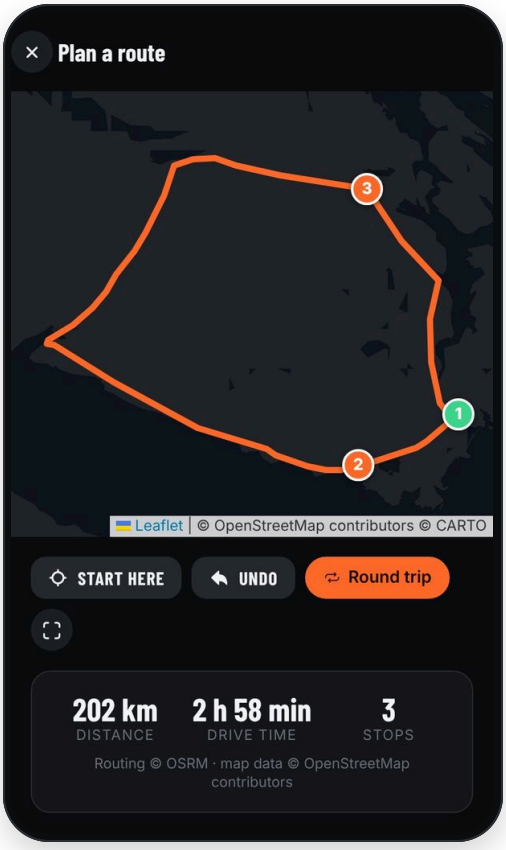

Plan your own drive stop by stop, then hand it to Google Maps, Waze or Apple Maps for turn-by-turn directions.

1. **Open the planner**
   Tap **+** → **Plan a route**. You can also start one from **Profile** → **Routes** or from the event form.

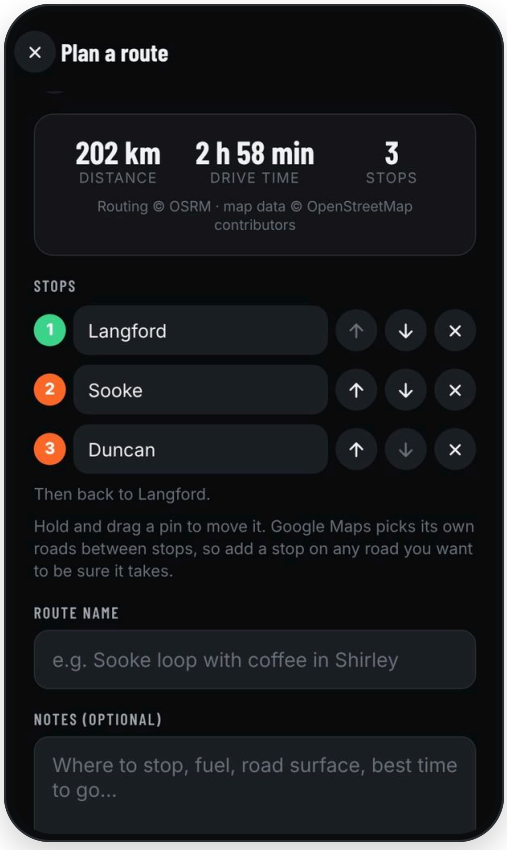

2. **Tap in your stops**
   Tap the map for your start, then each stop in order. The route follows the roads, and the distance and drive time update as you go. Each stop moves onto the nearest road and takes its name.

3. **Fine-tune it**
   Hold and drag a pin to move it. Use the arrows to reorder stops and × to remove one, or rename a stop by typing over its name. **Start here** adds where you are as the start, **Undo** removes the last stop, and **Round trip** brings you back to the start. Up to 10 stops (9 for a round trip).

4. **Save it**
   Give it a name and notes, then choose **Only me** or **Everyone** (shows on your profile for others to drive or plan an event on) and tap **Save route**.

A round trip with three stops

Name and reorder stops

PLAN

DRIVE YOUR ROUTE

Open any route from your profile, an event or the link you were sent.

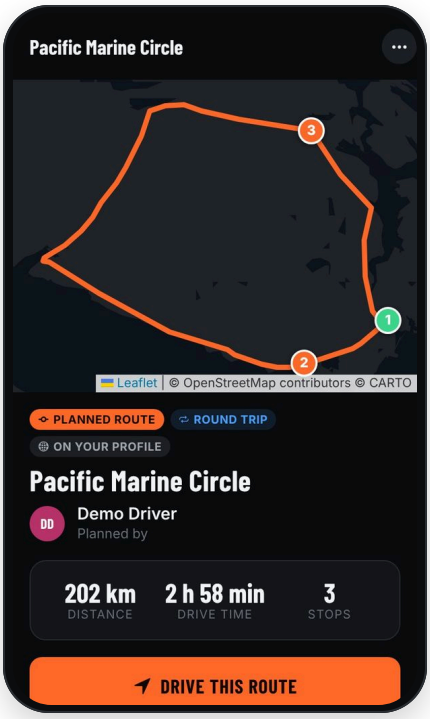

1. **Choose your navigation app**
   Tap **Drive this route**. The first time, pick **Google Maps**, **Waze** or, on iPhone, **Apple Maps**. The app remembers your choice, and Waze and Google Maps open straight in the app. Change it in **Settings → Directions**.

2. **How each app handles stops**
   Google Maps takes the whole route with every stop. **Waze** and **Apple Maps** take one stop at a time, so start with the first, then tap the arrow next to each stop as you go.

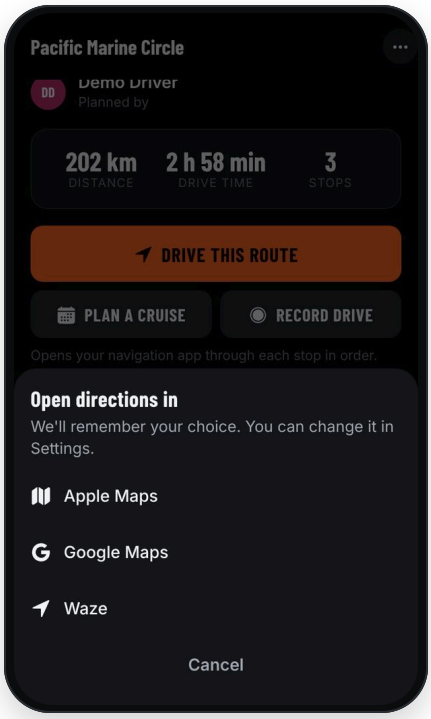

3. **Make it a cruise**
   Plan a cruise starts an event that uses this route, with the first stop as the meeting point. **Record drive** opens the recorder.

4. **Edit or share later**
   Tap ••• to edit the route, put it on your profile or make it private again, or delete it.

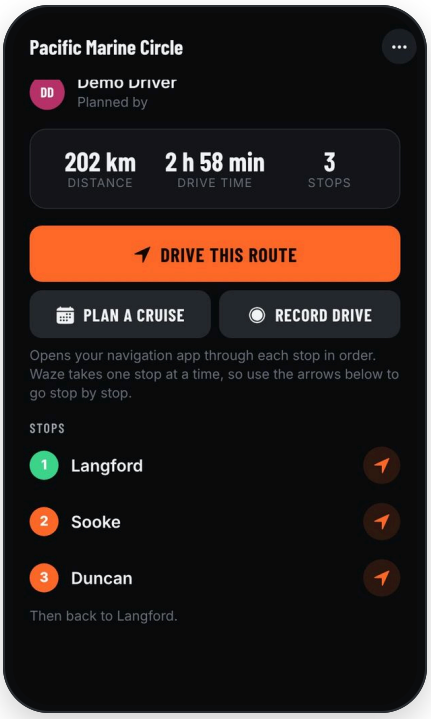

Tip: Google Maps picks its own roads between your stops. If there's a road you want to be sure it takes, drop an extra stop on it.

A saved route

Pick your navigation app

Directions to each stop

COMMUNITY

CAR CLUBS

Clubs are the heart of Drive Culture: group chat, cruises, a shared garage and a club leaderboard.

1 Find a club

The **Clubs** tab shows your clubs, the Club of the Month and clubs to discover in your area. Search or filter by category: JDM, Euro, Classic, Track days, EV and more.

2 Join

Open clubs let you **Join club** right away. Others need you to **Request to join** and an admin approves you, and some are invite only.

3 Inside a club

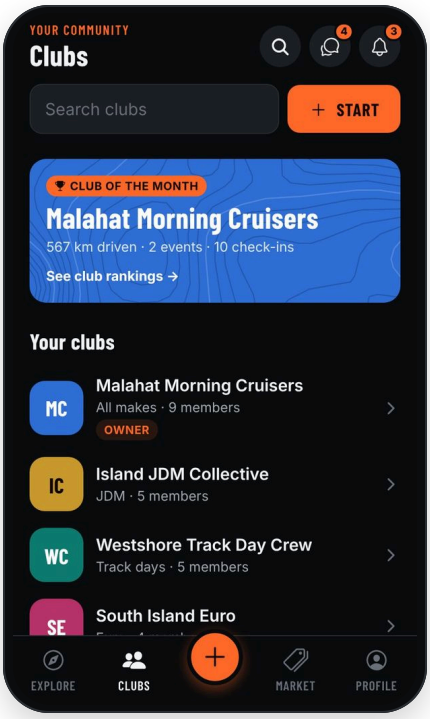

Tabs for **Feed**, **Events**, **Members**, **Garage**, **Leaderboard** and **Market** (club merch). **Club chat** opens the group chat. Private clubs are visible only to members.

4 Start your own

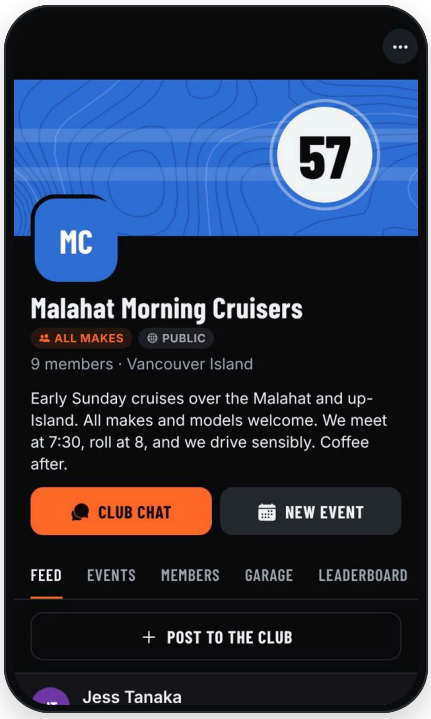

Tap **+ Start** on the Clubs tab. Add a name, description, category and area (Vancouver Island or Lower Mainland), choose public or private, and who can join: **Anyone**, **Approval** or **Invite**. As owner or admin you approve requests, invite people, post events (every member is notified) and can sell club merch.

5 The club banner

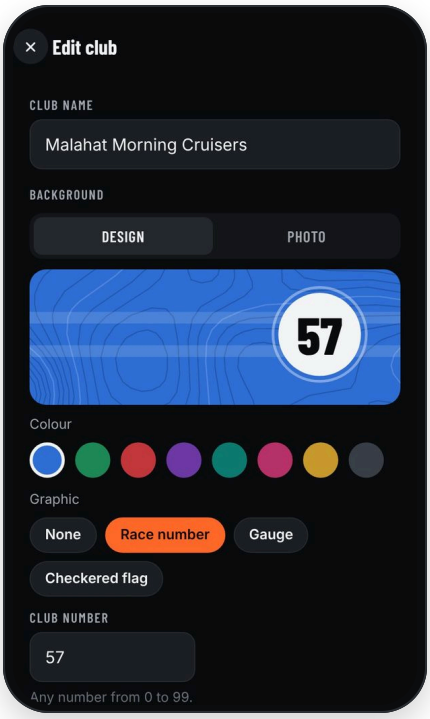

The owner and admins pick the club's background in **Edit club → Background**: a design in the club's colour with a race number, gauge or checkered flag, or a photo.

The Clubs tab

A club

The club's background

COMMUNITY

CRUISES AND MEETS

Find something to do this weekend, see who's going and show up.

1 Find events

Explore shows **Upcoming cruises & meets** in your area (tap **See all**). Clubs, roads and routes list their upcoming events too.

2 RSVP

Tap **I'm going** or **Interested**, and pick which car you're bringing. If there's a car limit and it's full, you join the waitlist and move up automatically when a spot opens. We'll let you know.

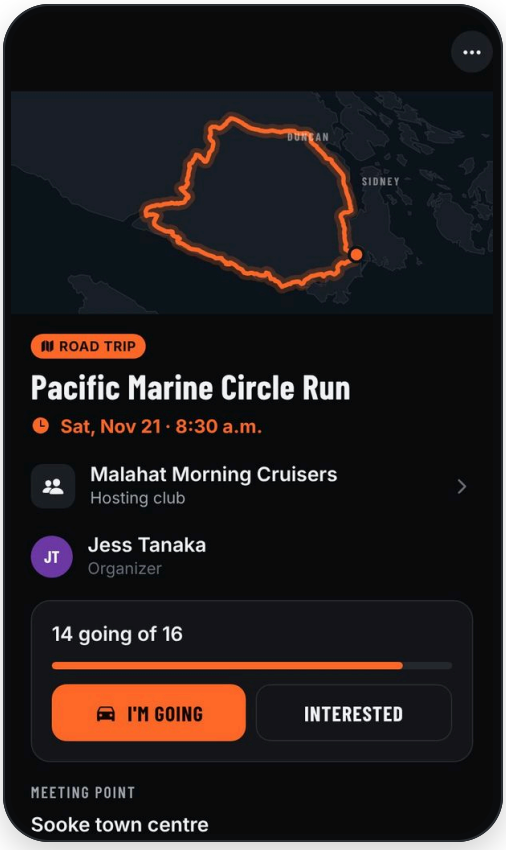

3 Get there

Directions takes you to the meeting point. If the event has a route, **Drive the route** opens it in your navigation app.

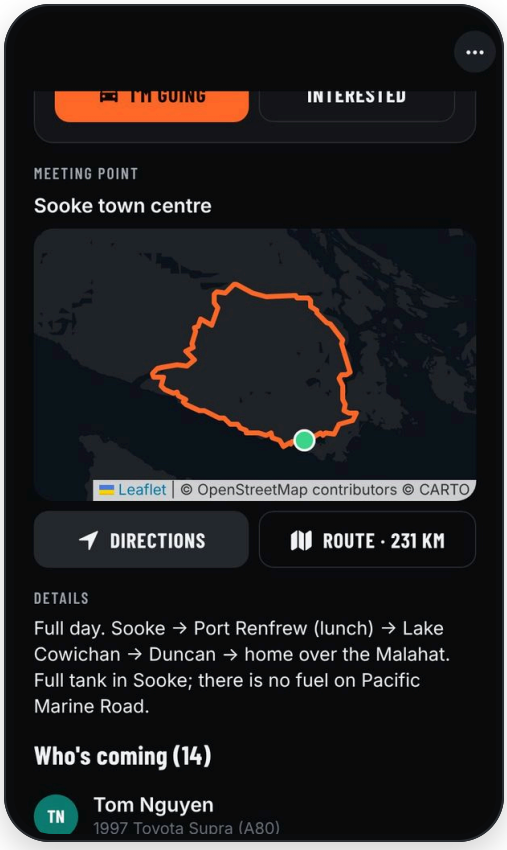

4 Check in

At the meet, tap **Check in at the meet**. It opens 2 hours before the start, and you need to be within 1 km of the meeting point. Check-ins count toward rankings and badges.

Plans change. If the organizer changes the time, meeting point or route, or cancels, everyone going gets a notification.

An event

Meeting point and route

COMMUNITY

LIVE MAP

On a cruise or meet, see where everyone in the group is: who's up ahead, who's fallen behind and where to regroup.

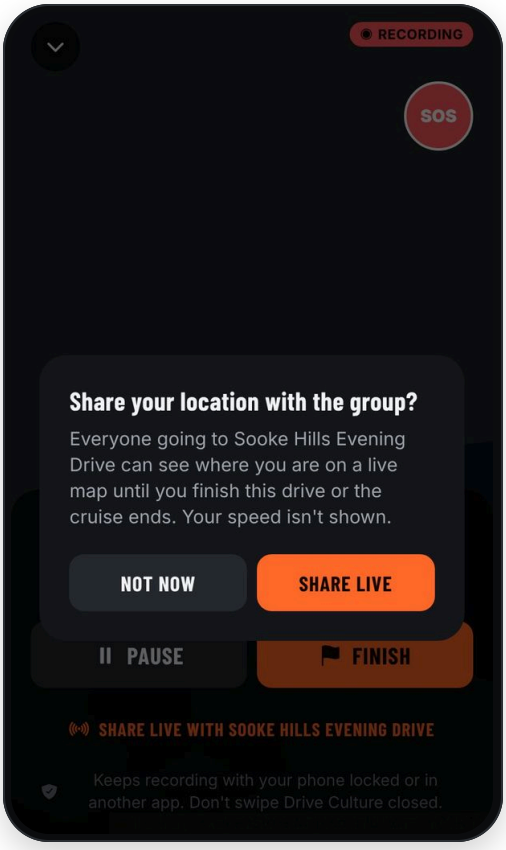

1. **Share your location**
   During a cruise you're going to, start recording your drive. The app asks **Share your location with the group?** Tap **Share live**, or **Not now**. Changed your mind? **Share live with** the cruise is on the recorder too.

2. **See the group**
   On the event, tap **Live map**. Everyone sharing shows with their initials, how long ago they updated and how far away they are. Tap someone to follow them on the map, or **Show everyone** to see the whole group.

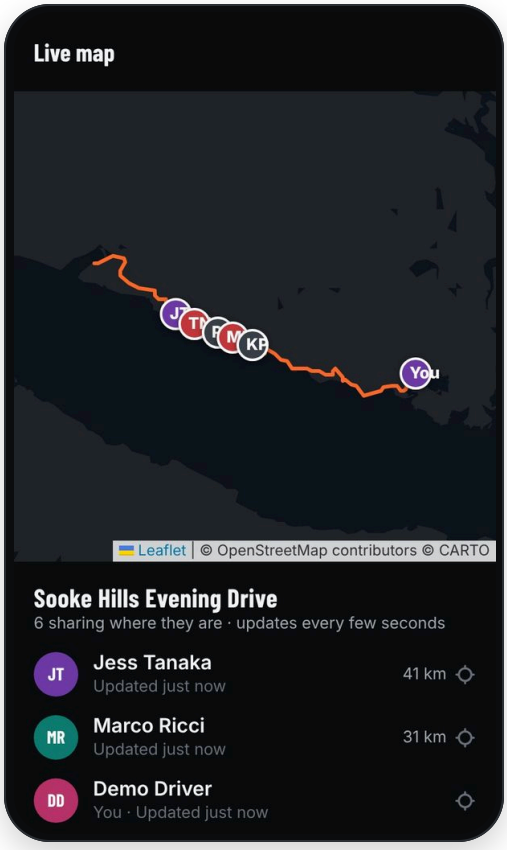

3. **Stop any time**
   Tap **Stop** on the recorder or **Stop sharing** on the map. Sharing also ends when you finish the drive or the cruise ends.

4. **Who can see it**
   Only the organizer and the people going, and only while the event is on: from 2 hours before it starts until 2 hours after it ends. Your speed is never shown, and positions are deleted after a day.

Passengers only. Never look at the live map while you're driving. Check it when you've stopped, or ask a passenger.

Asked when you start recording

The group on the live map

SAFETY

EMERGENCY ALERTS

On a cruise or meet, anyone going can alert the whole group with what happened and where they are.

1. **When it's there**
   For the organizer and everyone marked **going**, from 2 hours before the start until 2 hours after the end. Tap **Emergency on the drive?** on the event, or the red **SOS** button on the map while you record.

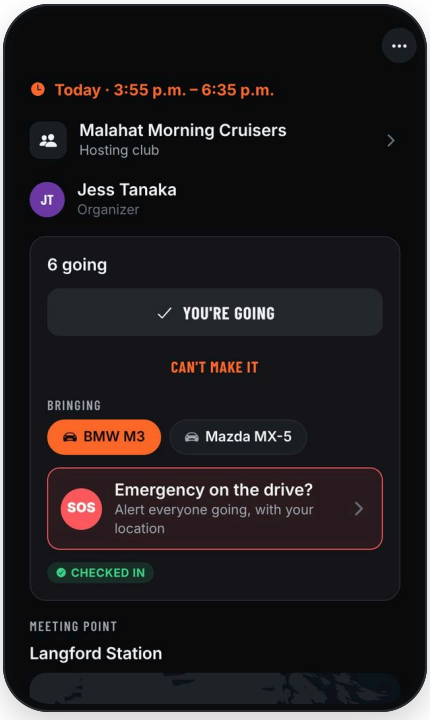

2. **Call 911 first**
   If anyone is hurt, in danger or blocking the road, tap **Call 911** at the top. A group alert doesn't contact emergency services.

3. **Alert your group**
   Pick what's happening (**Need help**, **Breakdown**, **Crash** or **Medical**), add a note if you can, then **hold the button for 2 seconds**. Your location goes with it.

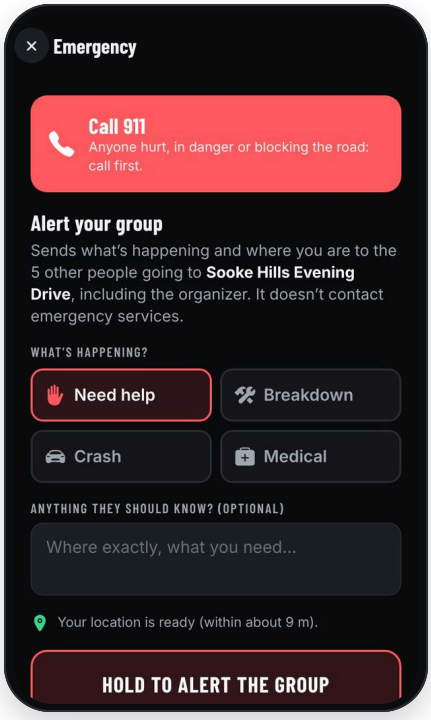

4. **After you send it**
   You see who has seen it and who's on the way. **Update my location** shares a fresh position, and **I'm OK, close the alert** tells everyone you're fine.

5. **When someone needs help**
   Everyone on the drive gets an urgent notification, and a red banner shows on the event. Open it to see where they are and how far away, then tap **I'm on my way**, **Directions** or **Message**.

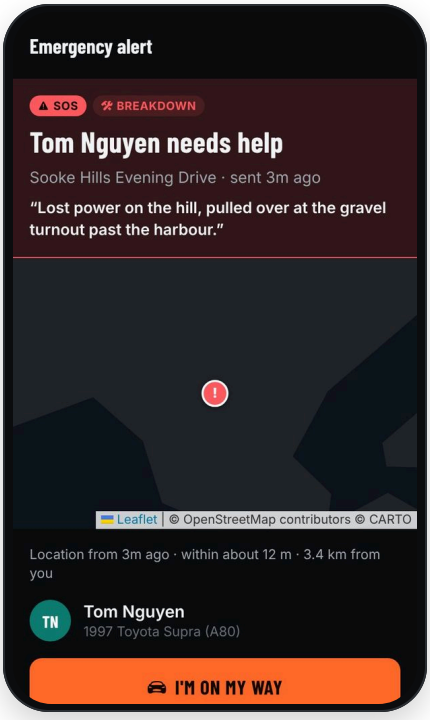

Keep notifications on so you hear about an alert on a drive you're going to. If your location is off, the alert still sends, so say where you are in the note.

On the event

Alert your group

When someone needs help

COMMUNITY

HOST AN EVENT

Anyone can host a public cruise or meet. Club admins can also post events to their club.

1. **Start it**
   Tap **+** → **Plan an event** (or **Plan a cruise** on a road or route). Give it a name and pick the type: Cruise, Meet, Road trip, Track day, Show or Other.

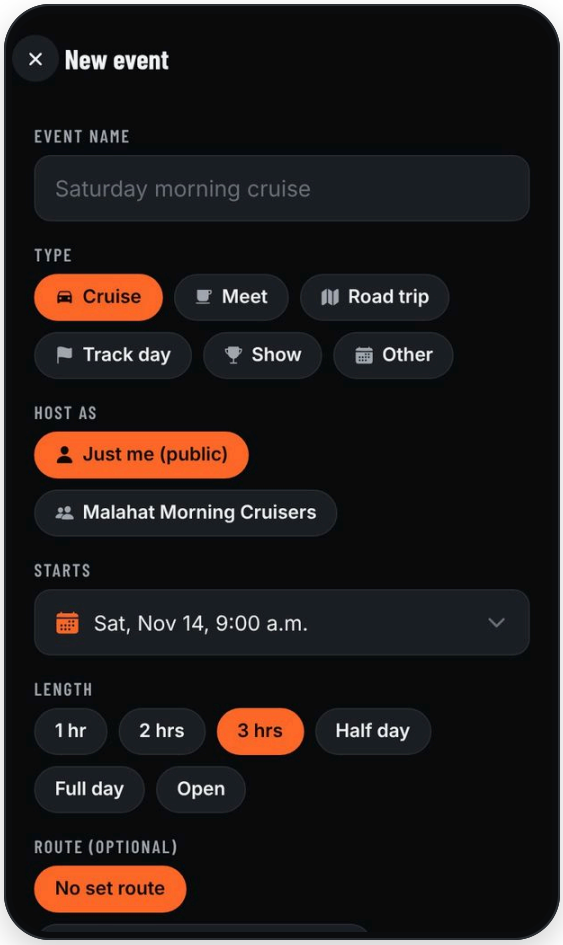

2. **Who and when**
   Choose whether you host it yourself or as your club, and for club events whether everyone or only members can see it. Set the start time and length.

3. **Where**
   Pick a route: one of yours, **+ Plan a route** to make one, or a road from the library. Name the meeting point and tap the map to drop the pin (or **Use my location**).

4. **Extras**
   Set a car limit if you want one (extra RSVPs go on the waitlist), and add details like stops, what to bring or a radio channel.

5. **Manage it**
   From ••• on the event: **Edit event**, **Invite club members**, **Cancel event** or **Delete event**.

Hosting for your club? Every member gets a notification when you post the event, and everyone going hears about any change to the time, meeting point or route.

The event form

COMMUNITY

FEED AND POSTS

Share builds, photos, drives and reviews with the people who follow you, or with your club.

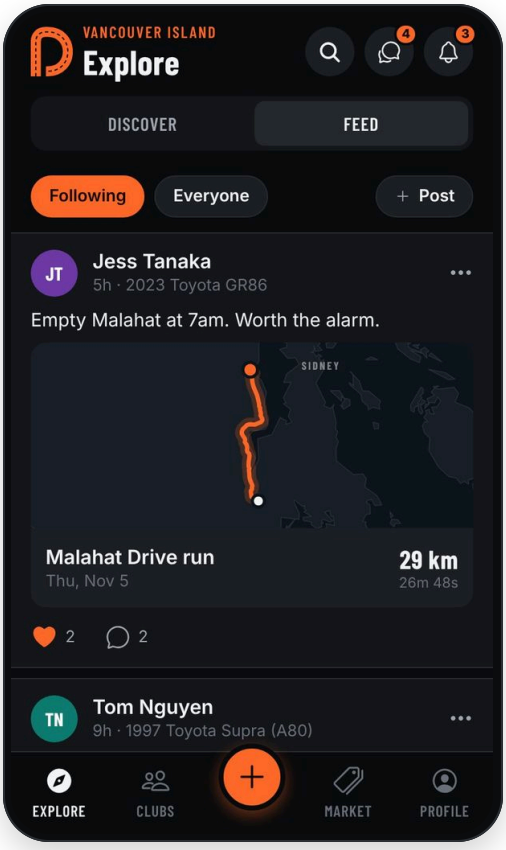

1. **Your feed**
   On Explore, tap **Feed**, then choose **Following** or **Everyone**. Tap the heart to like a post, or the bubble to comment.

2. **Share a post**
   Tap **+** → **Share a post** (or **+ Post** in the feed). Choose **Post**, **Build** (what you did to the car) or **Review** (with a star rating).

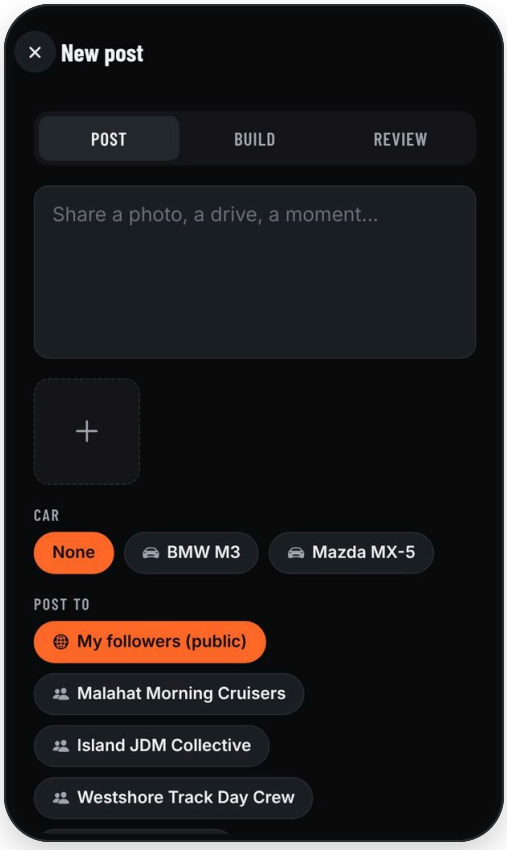

3. **Add photos and videos**
   Tap the **+** tile to add up to 10 photos or videos from your library, or take a photo. Videos can be up to 60 seconds.

4. **Tag and choose an audience**
   Tag the car it's about, then post to your followers or into one of your clubs.

5. **Share a drive, listing or event**
   Tap **Post to feed** on your drive or listing, or ••• → **Post to your feed** on an event. Each one goes in your feed once: after that the button says **In your feed** and opens the post.

The feed

Writing a post

MARKET

BUY AND SELL

A local marketplace for cars, parts, wheels and services, with parts matched to the car in your garage.

1 Browse

The **Market** tab has categories (Cars, Wheels & tires, Performance, Accessories, Services, Experiences, Club merch), search, featured listings and local automotive businesses.

2 Parts that fit

Under **For your garage**, tap your car to see only parts that fit it, marked **Fits your BMW M3** (or whatever you drive). Tap the bookmark on a listing to save it for later.

3 Contact the seller

Message seller opens a private chat linked to the listing.

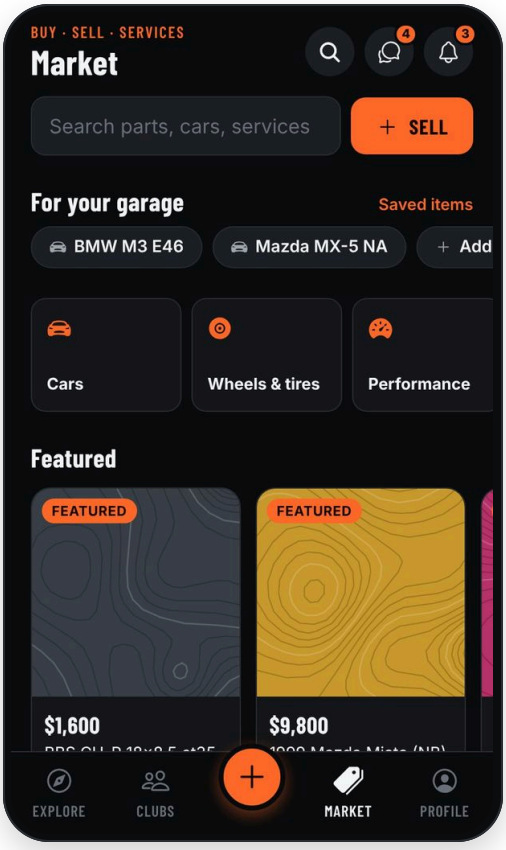

4 Sell something

Tap **Sell** (or **+ → Sell something**). Pick a category, then add a title, price (leave it blank to show "Contact"), condition, which cars it fits, photos, a description and your location.

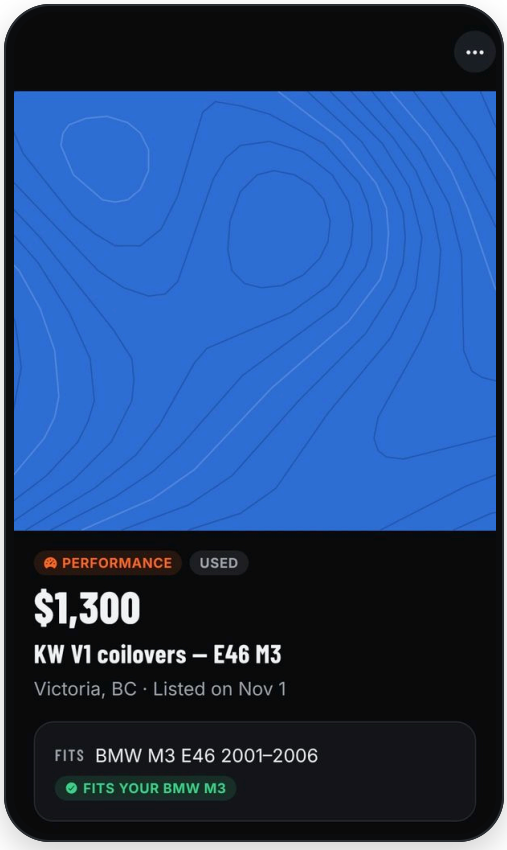

5 After it's up

From the listing: **Mark sold** (or available again) and **Post to feed**. Tap ••• to edit it.

Buy safely. Meet in a public place, inspect before paying, and never send a deposit to someone you haven't met.

The Market tab

A listing

REWARDS

RANKINGS AND BADGES

Rankings reward distance, exploring and showing up. Speed never counts.

1 **Driver rankings**

Tap **Rankings** on Explore. Rank by **Kilometres**, **Road explorer** (different roads), **Most active** (drives) or **Events** (check-ins), for this week, month, year or all time.

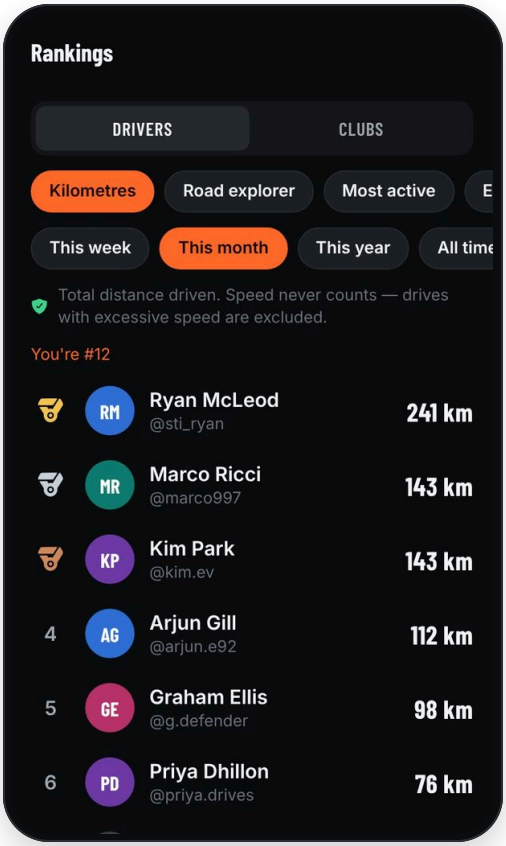

2 **Club rankings**

The **Clubs** board ranks clubs on their members' kilometres, events held, check-ins and posts. The top club each month becomes Club of the Month.

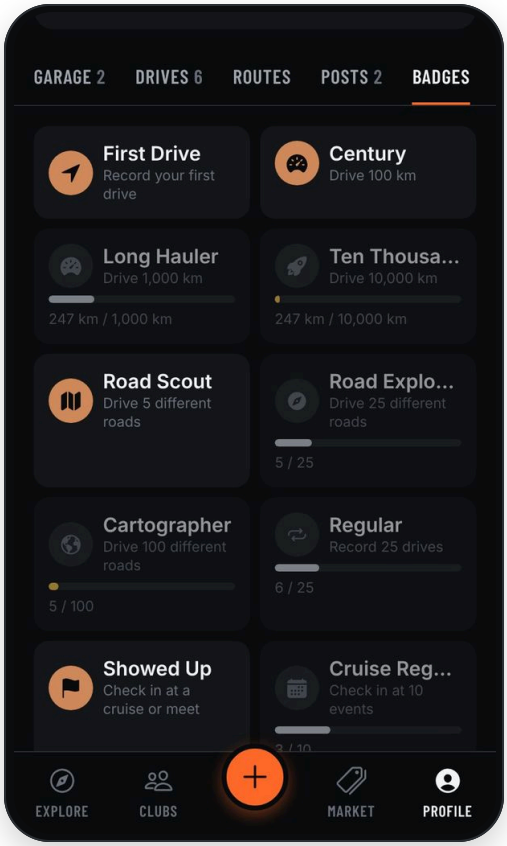

3 **Badges**

16 badges in bronze, silver and gold for your first drive, distance, roads explored, events, hosting, clubs, your garage and posts. See your progress under **Profile → Badges**.

Prefer to stay off the board? Turn off **Settings → Show me in rankings**.

Driver rankings

Your badges

STAY IN TOUCH

MESSAGES AND NOTIFICATIONS

Chat with your clubs and other drivers, and keep up with what's happening.

1 Messages

Tap the chat bubble at the top of the main tabs. You'll find your club chats and direct messages. Start one with the message button on someone's profile or **Message seller** on a listing. You can send photos too.

2 Notifications

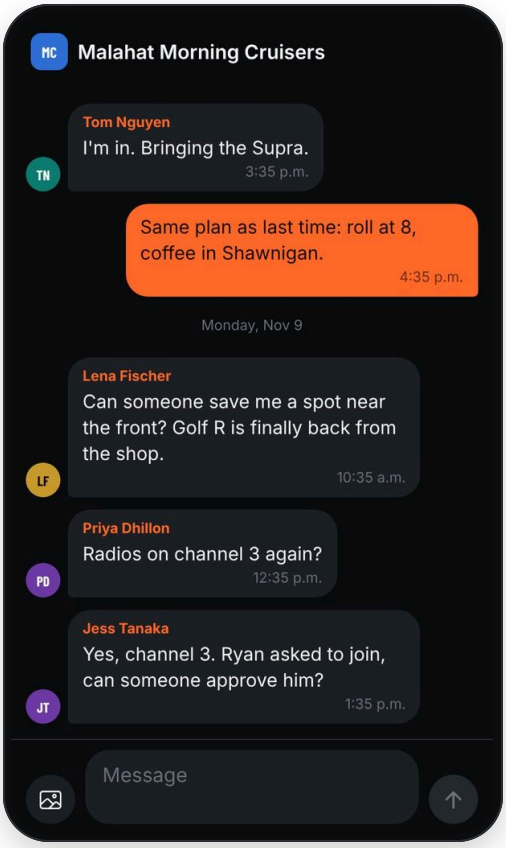

The bell shows likes, comments, new followers, join requests, club events and invites, event changes, waitlist spots, messages and emergency alerts. Allow notifications to get them on your phone too.

3 Follow people

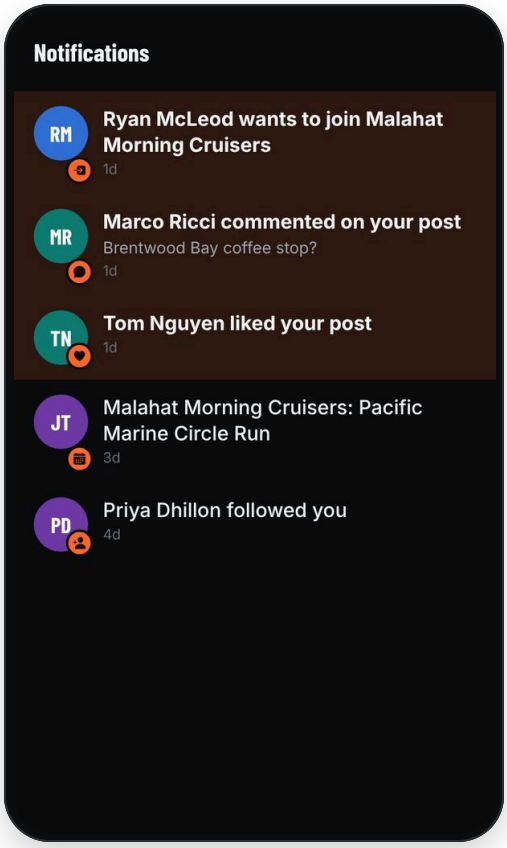

Tap **Follow** on a profile to see their posts in your Following feed.

4 Block or report

Tap ••• on any post, comment, message, listing, profile, club, event, road or route to report it or block the person.

HELP

COMMUNITY GUIDELINES AND QUICK ANSWERS

Drive responsibly
No street racing, speed runs, stunts or reckless driving, and no posts that show or promote them.

Phone down while driving
Start recording before you set off and leave the phone alone. Passengers can post.

Respect people and places
No harassment, hate or threats. Respect meet venues and neighbours, and leave no trace.

Honest marketplace
Describe items accurately. No stolen parts, weapons, drugs, counterfeits or emissions-defeat devices for road use.

Privacy
Don't share other people's plates, addresses or personal details without permission.

Reporting
Report anything that breaks these rules. We review reports and remove content and accounts that do.

QUICK ANSWERS

My drive stopped recording or looks wrong.
On iPhone, open **Settings → Drive Culture → Location**, choose **Always** and turn on **Precise Location**. On Android, turn on **Use precise location** and set the app's battery use to **Unrestricted**. Don't swipe the app closed while recording.

Part of my drive is a dashed line.
That stretch wasn't recorded, usually because the app was swiped closed or the phone lost GPS. It doesn't count toward your top speed.

Who can see my speed?
Only you. Everyone else sees your drive's distance, time and climb.

I only see Island roads and events.
Tap **Lower Mainland** or **Both** at the top of Explore, Roads, Clubs or Events.

Directions open the wrong app.
Change it in **Settings → Directions**. If an app isn't installed, its directions open in your browser.

I can't check in at an event.
Make sure you're marked as going, it's within 2 hours of the start, and you're within 1 km of the meeting point.

My drive isn't in the rankings.
Drives with excessive speed are left out, and so is everyone who turned off **Show me in rankings**.

I forgot my password.
Tap **Forgot password?** on the Sign in screen for a 6-digit code by email. Signed up with Apple or Google? Use that button again.

The text is very large or very small.
The app follows your phone's text size. The largest accessibility sizes are capped in a few places so every screen still fits.

How do I delete my account?
Settings → Delete account permanently removes your profile, drives, posts and listings.

NEED A HAND?

Email us at **driveculture.app@gmail.com**, or tap **Settings → Contact support** in the app.
